cat strike

…for those sharp claws

© petri huurinainen 2023

Cat Strike emerges from a gentle moment of play that suddenly turns unpredictable, where intimacy turns into intensity

feel the cat's hair by moving your hand slowly across her back

each hair has its purpose - get to know them individually

respond to the cat's spirit

establish the connection

when you're sure she is happy - perhaps you're feeling brave

you may push further

increase the speed, or

stroke backwards

when the cat's tail starts flicking back and forth

ears are pointing backwards

you must continue-

until suddenly, in lightning speed,

she jumps and

attacks

now you must

stop

and

reflect

reconcile with her - whatever it takes

you can only stop when she is back in her comfortable

cat zone

move yourself away from her

slowly

leave the room quietly
